

YAMAHACHI DENTAL CARBIDE BURS (CROSS CUT)

Various trimming and polishing fineness possible with 35 kinds of burs to choose from.

Super Fine Series

For Final Polishing

Form correction and trimming for various types of metal frames, porcelains and resins etc.

Maximum rotational speed: 20,000rpm

Packing unit	10pcs/set (1pc each)
	1pc (1pc/case)

Fine Series

For Medium-Finish Polishing

Form correction and trimming for metals, porcelains, resins and plasters, etc.

Maximum rotational speed: 20,000rpm

Packing unit	10pcs/set (1pc each)
	1pc (1pc/case)

Medium Series

Rough and Medium-Finish Polishing

Form correction and trimming for metals, porcelains, resins and plasters, etc.

Maximum rotational speed: 20,000rpm

Packing unit	10pcs/set (1pc each)
	1pc (1pc/case)

Coarse Series

Applications

Plaster trimming and form correction or rough polishing such as deburring of a denture base resin.

Maximum rotational speed: 20,000rpm

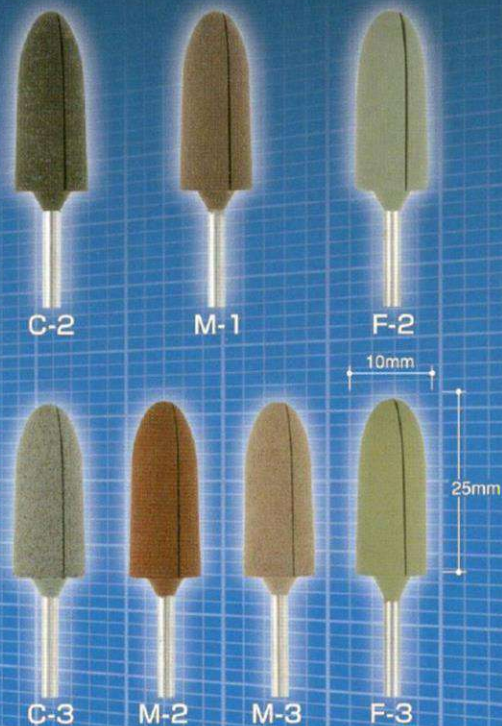

Packing unit	5pcs/set (1pc each)
	1pc (1pc/case)

Silicone Polisher with Slits

TWISTER BIG PAT.P

ADVANTAGE

- Two slits lengthways prevent bodies from heating up and give a soft polishing touch.
- Excellent durability and stability.
- Available in 7 types.

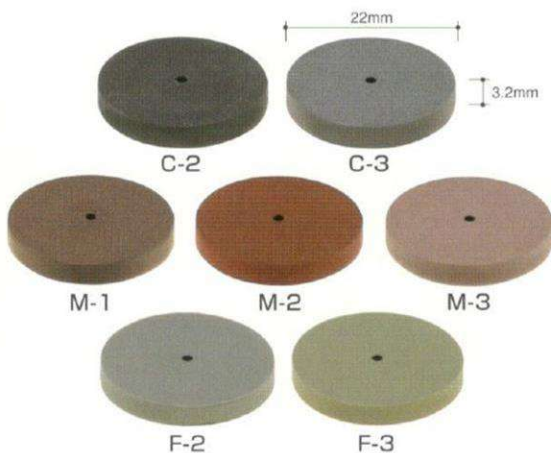

Packing	Polish	Color	Usage
C-2	Coarse	Black	Lab use Composite
C-3		Gray	Acrylic
M-1		Dark Brown	Amalgam, Precious Alloys
M-2	Medium	Brown	Lab use Composite
M-3		Light Brown	Acrylic
F-2	Fine	Green	Lab use Composite
F-3		Light Green	Acrylic

※The bigger number of sizes grow, the smaller the grain should be.

Speed	MAX15,000rpm	
Packing	10pcs/Box	100pcs/Box

Silicone Wheel TWISTER WHEEL

ADVANTAGE

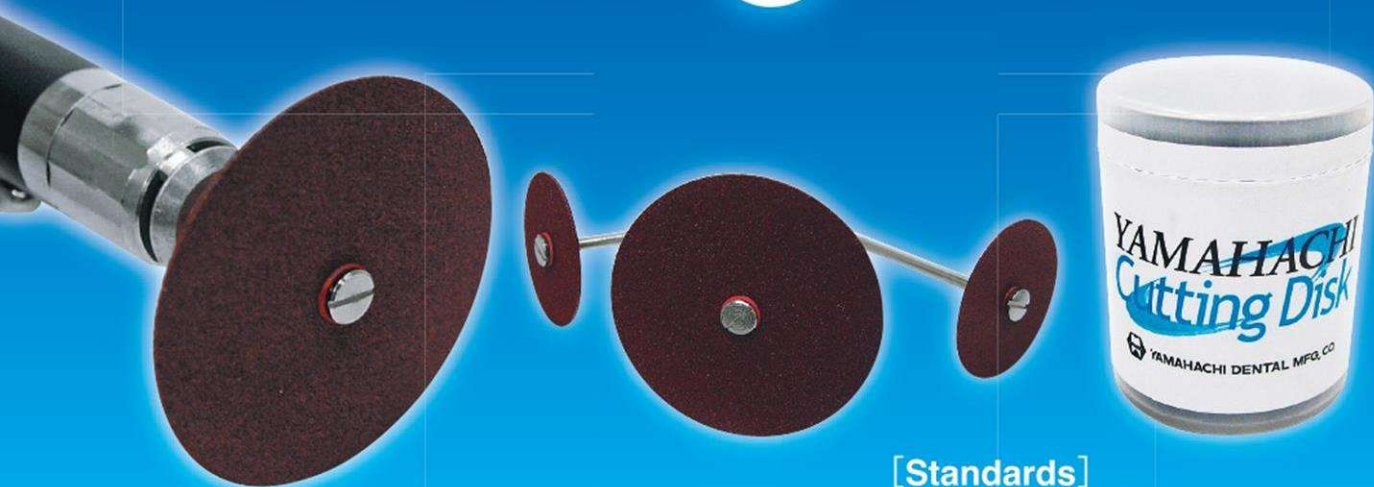

- Excellent durability and stability.
- Available in 7 types.

Packing	Polish	Color	Usage
C-2	Coarse	Black	Amalgam, Precious Alloys, Acrylic
C-3		Gray	Precious Alloys, Porcelain
M-1		Dark Brown	Cobalt-Chromium, Non Precious Hard Alloys
M-2	Medium	Brown	Amalgam, Precious Alloys, Acrylic
M-3		Light Brown	Precious Alloys, Porcelain
F-2	Fine	Green	Amalgam, Precious Alloys, Acrylic
F-3		Light Green	Precious Alloys, Porcelain

※The bigger number of sizes grow, the smaller the grain should be.

Speed	MAX20,000rpm	
Packing	20pcs/Box	100pcs/Box

YAMAHACHI Cutting Disk

[Features]

Excellent durability
High work performance
No clogging during the cutting process
High flexural strength

[Speed]

Max:15,000rpm

[Standards]

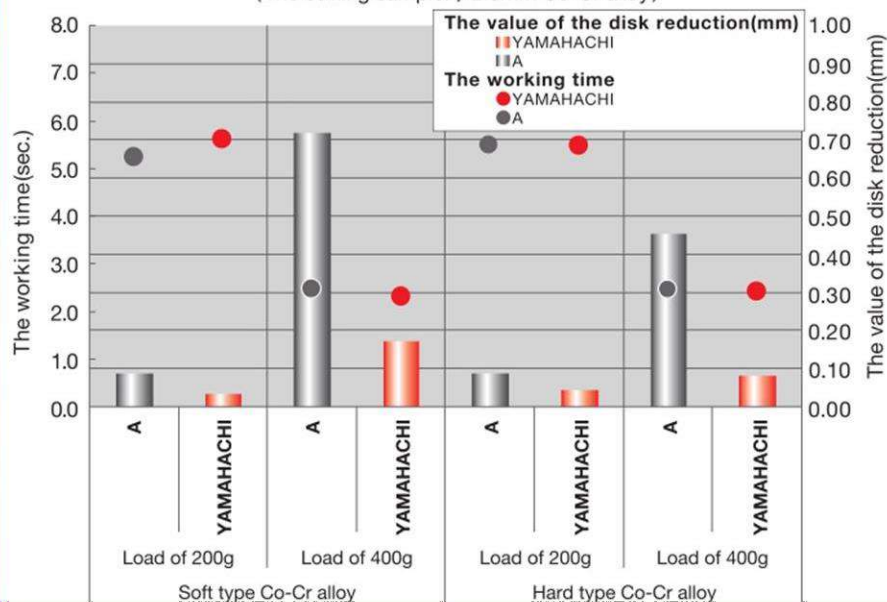

A type : $\phi 25 \times 0.35\text{mm}$
50pcs/pack for Separating Sprues
B type : $\phi 25 \times 0.60\text{mm}$
30pcs/pack for Metal Modification
C type : $\phi 38 \times 0.60\text{mm}$
50pcs/pack for Metal Modification
E type : $\phi 22 \times 0.23\text{mm}$
50pcs/pack for Porcelain Modification

[Technical Data]

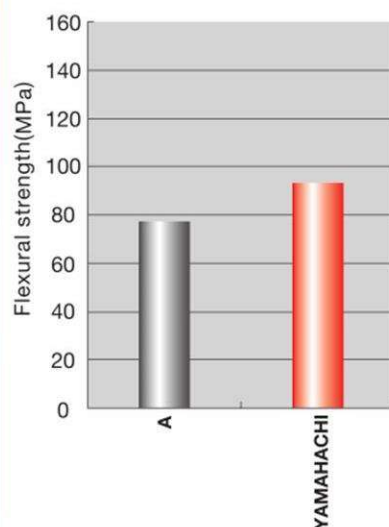

The Working Time and The Reduction of Disk(Diameter)

(The number of rotation to cut:20,000rpm)

(The cutting sample: $\phi 2.5\text{mm}$ Co-Cr alloy)

Flexural Strength

Combination Bar

- Complete várias tarefas sem alterar a broca
- Reduz o tempo de trabalho no laboratório e no consultório

Esta única broca permite executar:

Laboratório:

- Desgastar a base do dente artificial
- Proporcionar orifícios de retenção na base do dente artificial.

Consultório:

- Ajustar a oclusão da prótese dentária
- Aparar o rebordo da base da prótese dentária.

Características:

Diâmetro de ponta 1,6mm
25.000 rpm

Diamond Brush

- Escova de polimento grosso para resina acrílica
- Escova de fibra química desenvolvida de forma a ser inerte à eletricidade estática, não ficando empoeirada durante o polimento.
- Ideal para um polimento fino.
- Pacote: 3 uni
- Disponível: Suave (2 Filas) / Regular (2 ou 3 Filas)

HOG(High Quality) HAIR BRUSH

- A parte central é feita de madeira maciça, resultando em perda mínima de cerdas.
- A cerda é composta de material elástico fino para garantir um bom polimento obtendo excelentes resultados.
- Pack: 12 uni
- Disponível: 1 , 2 ou 3 Linhas

Acabamento & Polimento

MP BUFF

Recomendado para utilização juntamente com pó/pasta de polimento após o corte.

Material: Pano

Pack: 1 uni

Tamanho: 90 x7 mm

Million Buff

Material: Algodão

Pack: 1 uni

Tamanho: 90 x10 mm

Mirror Buff

Escova de cânhamo, ideal para polimento final de metais e resinas.

Alta capacidade de polimento.

Reduz o tempo de trabalho evitando o uso de lixa tornando-se 3-5 vezes mais eficiente.

Pack: 1 uni

Tamanho: 7,5 x 10 mm

Mandril #303

Pack: 12 uni
